ATS Energy's "Powder to Power" process transforms raw elements into high-performance solid-state power. Bismuth and tellurium are refined, sintered, and precision-finished into thermoelectric pellets,

About Advanced Thermovoltaic Systems Advanced Thermovoltaic Systems (ATS) is revolutionizing the way industries manage waste heat, providing the world's first and only solid-state

Waste Not - Want Not: The ATS Story No less than a "revolutionary solution to capture and convert industrial waste heat into sustainable electricity":

Advanced Thermovoltaic Systems deploys a modular, solid-state waste heat recovery solution to provide temperatures of 150°C - 500°C, applicable to most industrial heating applications.

Canadian-based Advanced Thermovoltaic Systems (ATS) was recognised for its technology to capture and convert industrial waste heat into sustainable electricity without the need

Advanced Thermovoltaic Systems (ATS), winner of the prestigious Earthshot Prize for its groundbreaking work converting industrial waste heat to electricity, is pleased to announce a

Advanced Thermovoltaic Systems (ATS) is the world's first and only solution for industrial waste heat--without a single moving part. It converts waste heat from industrial facilities into...

As ATS looks to the future, we remain laser-focused on accelerating our mission of converting industrial waste heat into clean electricity. With Doug

An Earthshot Prize and U.S. Dept. of Energy ITV Winner, ATS is the world's first and only solid state solution for industrial waste heat--no moving parts. It is a sustainable (99% circular) and cost

Advanced Thermovoltaic Systems (ATS, formerly known as Berken Energy) is a company that provides energy solutions. It develops a solution for capturing wasted heat by harnessing heat resources.

Among this year's Earthshot Prize winners is US-based Advanced Thermovoltaic Systems (ATS) which offers a simple, safe and reliable solution to
