

Agm deep cycle vrla battery

2V 400Ah AGM VRLA deep cycle battery engineered for renewable energy and industrial standby systems. Maintenance-free, spill-proof absorbed glass mat (AGM) construction for safe indoor

The batteries use colloidal or foamed silica gel to immobilize the electrolyte, which further enhances the cycling stability. Available in top and front terminal types.

OverviewApplicationsHistoryBasic principleConstructionAbsorbent glass mat (AGM)Gel batteryComparison with flooded lead-acid cellsMany modern motorcycles and all-terrain vehicles (ATVs) on the market use AGM batteries to reduce the likelihood of acid spilling during cornering, vibration, or after accidents, and for packaging reasons. The lighter, smaller battery can be installed at an odd angle if needed for the design of the motorcycle. Due to the higher manufacturing costs compared with flooded lead-acid batteries, AGM batteries are currently used on luxury vehicles. As vehicles become heavier and equipped with more electronic devi

The Gel and AGM Batteries are particularly suitable for high current discharge applications such as for inverters, thrusters and winches. Find a dealer near you.
