

Base power systems

Base Power is a Texas-based startup, backed by Lennar, that rents batteries to homeowners and then manages the power going into and out of the home.

Base Power has built one of the largest battery storage systems in Texas in two years -- and now it wants to grow faster. The Austin-based

Base batteries integrate directly with your solar system, storing excess energy during the day and providing reliable backup when the grid

Base Power offers a home backup energy solution that acts as both your electricity provider and your backup power source. The system provides up

New energy provider Base Power, from Zach Dell and Justin Lopas, aims to power Texas homes at affordable costs with reliable backup electricity

The future of energy is arriving not through massive power plants but through small, modular units installed in people's homes. Base Power, a fast

Austin-based startup Base Power is installing a fleet of batteries at homes across Texas to support the grid--and helping homeowners get cheap

Home backup at a fraction of the cost of a generator--no solar required, no gimmicks, no surprises. Reliable power and real savings, wherever we serve.

Base pairs fixed, low energy rates with a whole-home battery--get cheaper power when the grid is up, and home backup when the grid is down.

Base Power designs its battery systems to work independently of solar infrastructure. Homeowners choose from two options: a 25 kilowatt-hour or

Maximize your solar investment with Base: Learn how our innovative battery system seamlessly integrates with solar, optimizes energy storage, and stabilizes the grid.

The systems provide backup power for homeowners while feeding into a managed network that trades electricity when grid prices fluctuate. Base's

Base power, or energy storage, is vital for making our power grid work smoothly, especially with more

Base power systems

renewable energy sources being used. New battery materials and smart grid

To get started with Base, you pay a \$50 refundable deposit upfront. This deposit applies toward your one-time installation cost once your battery is installed, and is refundable until your home photos are

Understanding how Base charges and discharges its batteries We get a lot of questions about how Base charges and discharges our batteries--and for good

Learn about the technology that makes Base the most affordable home backup in Texas, and save homeowners money on their electricity bills. Energy done smarter.

For the project with EPE, the company will install a fleet of batteries at customer homes, which the utility will control to address times of peak demand on the grid. The partnership is

Technical specifications for the Single Ground home battery system from Base Power. 25 kWh capacity, 38" width, 36.25" height, 24" depth. View detailed performance data.

Base Power's all-in-one energy system uses the sun to generate electricity through photovoltaic (PV) solar panels. Excess energy is stored in batteries, with the option of a backup generator for times of

What's the lifespan of the Base battery? What hardware does Base use? Do you have spec sheets for the system? What is the temperature range of the battery? Why does Base request home photos?

Base Power's system has homeowners paying a \$3,000 one-time installation fee. From there, the homeowner is also responsible for the monthly

Learn how Base's home battery system works, from grid connectivity to outage protection. Discover how our intelligent software optimizes your home's energy
