China raced ahead building renewable energy last year, installing more wind and solar power than ever before and continuing to leave all other countries in the dust.

China has achieved stunning growth in its installed renewable capacity over the last two decades, far outpacing the rest of the world. But to

On Feb. 4, shares in some of China's largest solar energy companies suddenly surged after reports that Elon Musk was looking to tap Chinese resources for his ambitious energy plans. The

China is leading this surge by a wide margin. In the first half of 2025, the country installed more than twice as much solar capacity as the rest of the

Solar power is the most spectacular of China's clean-energy game changers; its fruits can be seen all around the world and at every scale, from

Photovoltaik-Messen ab M&#228;rz 2026 haben folgende Messetermine zum Thema Photovoltaik ergeben: PEI Provincial Home Show Charlottetown, Light+Building Frankfurt am Main,

China's solar industry is a poster child for the country's economic rise over the last four decades. The output of Chinese solar grew by 76% annually between 2004 and 2013, and by 2019

China's approach to renewable energy buildout combines large-scale investment, technological innovation and market reform. China is installing more

China has refrained from setting ambitious goals for solar energy in its latest five-year plan, highlighting the sector's mounting challenges after years of explosive growth.

China's installations of wind and solar in May are enough to generate as much electricity as Poland, as the world's second-biggest economy

China could accelerate the development of the Zhuri &quot;Chasing the Sun&quot; project, an ambitious plan to build a space-based solar power station.

China Solar PV News Snippets: Sineng Powers 300 MW/1,200 MWh Hybrid Storage & More Hiconics to raise RMB 1.65 billion for PV and storage; Shandong waives fees for local

To meet China's goal of carbon neutrality by 2060, substantial investment in upgrading power systems needs

to be made to optimize the deployment of new photovoltaic and wind power

Die Internationale Energieagentur hat im Photovoltaic Power Systems Programme (IEA PVPS) neue Daten zur Photovoltaik in China vorgelegt. Demnach gab es im Jahr 2024 ein

Sungrow, a China-based manufacturer of PV inverters and ESS, has secured the No.1 ranking in BloombergNEF's 2025 inverter bankability survey. The survey has recorded 100%

China is cementing its position as the global leader in renewables development with 180 GW of utility-scale solar and 159 GW of wind power

China Green Electricity Investment mit Sitz in Tianjin, das Windkraft- und Photovoltaik-Projekte betreibt, hat einen Solarpark mit einer Leistung von

Ende letzten Jahres waren in China Photovoltaik-Anlagen mit insgesamt fast 887 Gigawatt Leistung installiert. Damit wuchs die Photovoltaik

China is taking decisive steps to manage the environmental impact of its massive solar energy infrastructure. On Tuesday, the Ministry of Industry and Information Technology (MIIT) and

In China installierte Gesamtleistung der Photovoltaikanlagen von 2012 bis 2024 Ein Vergleich der gr&#246;&#223;ten Photovoltaik-Produzenten zeigt, dass China innerhalb weniger Jahre zu einer

(Bloomberg) -- China's solar power generation overtook wind for the first time last year as a boom in cheap panels continues to reshape the country's grid and climate trajectory. The nation

From a net profit of RMB632 million to a loss of nearly RMB10 million -- what went wrong for Arctech Solar, China's leading PV tracker manufacturer, in 2025?

Simply sign up to the Renewable energy myFT Digest -- delivered directly to your inbox. China's emissions from energy and industry fell slightly last year after a solar boom helped to meet a ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest hydroelectric

China's surge in renewables and whole-economy electrification is rapidly reshaping energy choices for the rest of the world, creating the conditions for a decline in global fossil fuel use.

China's solar power generation overtook wind for the first time last year as a boom in cheap panels continues to reshape the country's grid and climate trajectory.
