

Conteg pdu manufacturer

Compañía dedicada al diseño y fabricación de racks y envolventes profesionales para los sectores industrial, electrónico y de telecomunicaciones.

Managed PDUs The managed power distribution units enable remote monitoring of energy consumption (input metering) and metering on each individual outlet including the ability to control the outlets.

Descubra proyectos reales de Data Centers diseñados e implementados por nuestro equipo técnico, donde combinamos racks, refrigeración y soluciones de infraestructura para garantizar máxima

The PDU can be integrated into the CONTEG Pro Server control system for central administration, or into third-party systems (MIB table available). Hybrid access technology - Ethernet connection and

CONTEG is a Czech family business founded by Jan, Vit and Vojtech Volacek in 1998. Today, we operate our own laboratory and facilities to develop and

Conteg is one of the biggest producers of IT and industrial racks, and data center solutions in EMEA. In our product portfolio, you can find telecommunication,

Power Distribution Units Our portfolio of rack Power Distribution Units (PDUs) for IT environments with high power density comprises 3 types-- managed PDUs, allowing the user to control individual

Our portfolio of rack power distribution units (PDUs) for IT environments with high power density comprises of 3 types-- managed PDUs, allowing the user to control individual outlets or groups of

Managed PDUs allow integrating into a CONTEG Pro Server monitoring system for central management or into a third-party system (MIB table available). Hybrid access technology--Ethernet connectivity

The monitored power distribution units (PDUs) include an easy-to read display, communication interface for remote monitoring (over an Ethernet) of the current and also MIB file for the integration

Monitored PDU allows an administrator to monitor PDU power consumption information from a remote terminal and interface. This can be helpful if a remote machine has gone into a power overload state

The sensor detects the temperature and humidity inside the cabinet. Connects using a 2.5 m cable directly to a monitored or managed power panel. Upon

Conteg pdu manufacturer

Our PDUs are designed to provide reliable power distribution, as well as precise monitoring and control of equipment installed in data centers. They allow for optimization of available power and control of

Added to the order Temperatur- und Feuchtigkeitssensor PDU Continue shopping Go to the order In den Warenkorb Um ein Produkt zu Ihrer Bestellung hinzuzufügen, müssen Sie Anmelden/Registrieren

The PDU offers an easy set up and user-friendly communication software. This software provides the function that assistant manager to remotely monitor the multiple PDU power consumption to realize

Intelligente Stromverteilungseinheit mit Überwachung Die Steckdosenleisten sind mit einem leicht abzulesenden Strommesser an der Abgangsdose ausgestattet,

Managed power panels ensure not only the supply of electricity and its distribution to IT devices in the cabinet, but also enable remote control of individual sockets
