Cubic modular

The CUBIC modular system provides the products, ancillaries, tools, and support you need to design and build optimized electrical switchboards and motor

The power of modular thinking gives you the freedom to assemble any kind of motor control center with the CUBIC modular system.

CUBIC"s design software is Galaxy, which allows for the conduction of temperature-rise calculations to ensure proper and easy construction of switchboards. The company"s modular solutions are all

The main module of the CUBIC modular system is 192 mm, which is remarkable for being divisible by 12 igures without decimals. During the construction of a panel, logical main and sub modules are used

CUBIC is a leading manufacturer of electrical switchboards and technological solutions for energy distribution and automation. With more than 50 years of experience in the industry and a focus on

The CUBIC modular system is based on a concept of standard modules for the construction of electrical panels. Using a relatively few standard parts it is possible to construct a bespoke enclosure from a

CUBIC was founded in 1973 based on a unique idea for a modular system for the construction of electrical panels. This idea has since the early start developed CUBIC into a global and recognized

The modular system allows for customized electrical panels to be built using relatively few standard parts. Panels can be easily assembled, modified, and

Combining multiple insert solutions In the CUBIC Modular System several insert solutions can be used in the same switchboard - even in the same column - to configure compact and

Cubic Modular System India Private Limited provides you the best range of electric control panel, electrical fuse, electrical switch board, copper busbar, outdoor enclosure & control panel with

The CUBIC Modular System is used for all kinds of purposes and industries where safe and efficient electrical distribution is needed.The product is one of the most versatile and safe enclosure solutions

Cubic Modular System Being developed in Denmark, the Cubic Modular System was integrated in our offer since 2015. The modular construction - each element consists of an integer number of modules

Enhance Performance with Smart Automation Pair the CUBIC Modular System with industry-leading

automation and information systems to elevate your panels with

Cubic modular
