

Energy storage eu

The European Commission has adopted a legislative proposal planning to introduce EU-made content requirements for products benefiting from public funds, including solar photovoltaics

Felicity 23.5 kWh low-voltage storage system Scalable, IP65 & high efficiency Ideal for PV self-consumption & emergency power Durable & maintenance-free Discover now!

European natural gas prices surged on Monday as the escalating conflict in the Middle East caused Qatar to stop LNG production at the world's top plant.

EU Battery Regulation: What is required from battery energy storage owners and project developers? The aim of the EU Battery Regulation is to harmonize and tighten requirements

Energy Storage Europe is actively shaping the legal and R& D funding framework for energy storage at EU level. Members gain direct influence in the European decision-making process.

Each year, ees Europe, Europe's largest and most international exhibition for batteries and energy storage systems, provides a networking opportunity for the industry's key players, such

Norwegian residential seasonal storage start-up Photoncycle said today it has raised EUR 15 million (USD 17.5m) in Series A funding to support commercialisation of its solid-state hydrogen

Trina Storage and Gore Street Capital are forming a new Europe-focused battery energy storage (BESS) fund. Gore Street expects the overall size of the fund and co-investment to rise to EUR1

The listed Gore Street Energy Storage Fund has delivered a rare level of success, and this gives us confidence in this new EU BESS Fund, alongside prestigious partners like Gore Street

On 24 February, Sunwoda participated in Energy Storage Summit 2026 in London, showcasing its latest battery innovations as well as utility-scale and C& I ESS solutions. During the

But annual EU installations are set to drop in 2027 before picking up to flat growth from 2028 as developers face challenges in delivering their pipelines of projects, Energy Storage Europe

Aurélien Ballagny, Senior Policy Officer at Energy Storage Europe, agreed that the introduction of EU-origin requirements across the battery supply chain must be gradual in order to

US-based long-duration energy storage start-up Qnetic has raised USD 5 million (EUR 4.32m) in new funding

Energy storage eu

to launch domestic manufacturing and deploy the first units of its Q500

EU gas storage below 30% Market pressure intensifies as Europe's gas storage levels fall below 30%, according to data from the Swiss Federal Office of Energy (SFOE). Lower inventories

As the electric grid grows more complex, battery-energy storage systems (BESS) are growing. Here's how developers can succeed in a rapidly evolving market.

European Union (EU) countries have made limited progress in implementing recommendations on energy storage deployment and electricity network flexibility.

RGI and CAISO have joined forces for this paper Europe and California are leaders in the energy transition RES integration and fossil phase out require new services for the stability of the system

EASE is actively shaping the legal and R& D funding framework for energy storage at EU level. Members gain direct influence in the European decision-making process.

Gas prices in Europe are rising as Middle East tensions disrupt global energy flows, fuelling fears of tighter LNG supplies. Analysts warn that if the conflict persists, higher wholesale costs ...

The new funding will support commercial rollout in Denmark and the Netherlands and finance the first phase of an industrialisation plan, including a proposed 1.4 TWh annual

The Coalition aims at accelerating the decarbonisation of the European energy system by increasing the deployment of sustainable and clean energy storage solutions to support renewables.

The made-in-Europe battery strategy is reshaping the EU energy storage market. A report by Transport & Environment highlights that scaling local battery manufacturing could narrow the cost

Dutch grid-scale storage specialist S4 Energy has agreed to acquire a 30-MW battery energy storage system (BESS) project in the UK in a drive to expand its presence in the local market

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy

Norwegian energy storage scale-up Photoncycle has raised EUR15 million in Series A funding to tackle one of Europe's key renewable energy challenges: storing surplus summer solar power for

Nuvve Holding (NVVE) Signs \$5M European Energy Storage Agreement with Capture Energy AB Published on March 6, 2026 at 2:34 am by Maham Fatima in News

Energy storage eu

Trina Storage has secured over 65 projects in Europe since its first contract was signed in December 2020. Trina Storage, the global energy storage solutions provider and a business unit

2026 is set to be a year of growth for the European energy storage sector, and a pivotal year for the wider energy transition. Our Summit aims to highlight the

Battery storage systems are becoming increasingly important for the energy transition and their deployment is surging. Since 2021, the installed capacity of battery energy storage systems
