The European Commission's newly drafted Industrial Acceleration Act (IAA) requires publicly subsidized clean energy projects to use EU-manufactured components. Photovoltaic projects must

Temporis Capital, Clarke Energy and Trina Storage are proud to announce they have entered into construction contracts to deliver a 50MW/100MWh Battery Energy Storage System

The Industrial Accelerator Act (IAA) proposed by the European Commission on Wednesday marks a new era for solar manufacturing in Europe, SolarPower Europe said, but there

Société Tunisienne de l'Electricité et du Gaz (STEG) is planning to secure a loan of EUR 40 million from the European Bank for Reconstruction and Development (EBRD) to support a new

The European Commission on Tuesday launched a competitive tender that seeks to provide EUR 54.9 million (USD 63.8m) in investment grants to support ground-mounted solar

Battery Storage Europe Platform launched last week with a call to 10X BESS installations by 2030. Image: SolarPower Europe The European Union

Sungrow has been ranked the No.1 bankable inverter brand in BloombergNEF's 2025 inverter bankability survey with 100% respondent recognition across global markets.

Like residential solar, the market for battery storage will continue its upward path; the crucial question is how fast will it grow? In this regard, it's of utmost importance that the upcoming EU Battery

Delta Capacity, a Swiss-based developer and long-term owner of utility-scale battery energy storage systems (BESS), has signed a framework agreement with Sungrow for the supply of 1 GWh

Trina Storage has made a commitment to invest in GSC's EU BESS Fund, joining other organisations including the European Investment Fund, Irish Strategic Investment Fund, and a range of leading

SolarPower Europe estimates the continent added 21.9 GWh of battery energy storage systems (BESS) in 2024 for an eleventh straight record

The European Commission's newly drafted Industrial Acceleration Act (IAA) requires publicly subsidized clean energy projects to use EU-manufactured components. Photovoltaic projects must integrate EU

New independent market research confirms what installers across the country have already discovered. With a

Eu solar bess

staggering 42% estimated quote share, AlphaESS is now the most quoted BESS brand in the

London, UK - 5 March 2026 - RES has surpassed 3GW of solar and battery energy storage systems (BESS) under operations and maintenance contracts (O& M) in Northern Europe, marking a

According to our Mission Solar 2040 study, EU-27 BESS capacity must reach 780 GWh by 2030 to fully support the transition. This report outlines five key policy recommendations to unlock

Enery has closed a EUR460 million (US\$534 million) syndicated green project financing for a 761MWp solar, 1GWh-plus BESS project in Romania.

The authors of the report forecast a strong BESS growth this year. New analysis reveals another year of record installations for European battery

The EU's proposed "Industrial Accelerator Act" mandates local content for publicly funded clean tech. Solar projects require EU-made inverters and cells within three years, a timeline local

UK government data shows that two out of three solar projects currently awaiting planning permission are slated to include co-located BESS. Germany, in the midst of a standalone

Our five-year outlook foresees significant BESS expansion in Europe - a sixfold increase to nearly 120 GWh by 2029, driving total capacity to 400 GWh, yet falls short of energy transition needs.

Latest analysis from SolarPower Europe reveals that, in 2023, Europe installed 17.2 GWh of new battery energy storage systems (BESS); a 94% increase compared to 2022. This marks the

Argentina launches 700 MW storage tender with 15-year contracts The "AlmaSADI" auction will allocate stand-alone BESS projects of 10-150 MW, with bids opening between May and June.

The IAA introduces "made-in-EU" requirements for public procurement for clean technologies including batteries, battery energy storage systems (BESS), solar PV, heat pumps,

The European Union (EU) will not meet its 2030 clean energy targets unless cumulative battery storage deployments rapidly accelerate, SolarPower

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total

The BESS market in Europe is set to grow faster in the next years, although not at the levels required. In the most-likely scenario for 2025, 29.7 GWh of battery storage will be installed in

Eu solar bess

The EU's "Industrial Accelerator Act" for key domestic manufacturing sectors has been met with mixed reactions by the continent's solar industry.

For solar photovoltaic (PV) projects, the proposal mandates that three years after the IAA enters into force, public procurement, renewable energy auctions, and support schemes must

Discover the new Aster TB250/TB500 commercial and industrial BESS with advanced safety, flexible scalability, and simplified installation for EU projects.

SolarPower Europe has warned newly proposed EU industrial policy puts BESS deployment progress at risk, while noting the European Commission has "found a balance" with its solar
