

Franklin battery storage

Franklin solar batteries have a peak power output of 10 kW, which allows them to start and run large loads, like an air conditioner or heat pump.

A single aPower 2 can handle these demands. If you own a large property and has a much higher energy demand than normal, you can use our

SAN JOSE, Calif., March 3, 2026 /PRNewswire/ -- FranklinWH Energy Storage Inc. (FranklinWH), a leader in whole-home energy management solutions, announced today its

The FranklinWH energy storage system provides an open and robust home energy management solution that integrates solar, battery, grid, generator, and EV

Franklin Energy delivers turnkey battery storage systems that cut demand costs, boost resilience, and integrate with solar to maximize renewable performance.

It is managed via a simple mobile app and provides real-time monitoring and control for a home's day-to-day energy usage. The FHP system is designed to supply

The FranklinWH battery is one of the newest and most exciting home energy storage systems on the market. We break down the cost, features, and early

We currently offer the FranklinWH Energy Storage system, Tesla Powerwall, and Enphase IQ Battery. Whether you're adding storage to an existing solar system

Most home batteries, including the aPower, only have enough capacity to store a few hours of electricity. That being said, the FranklinWH

The aPower S is a new-generation home energy solution that integrates formerly external inverter with battery storage into a single unit. The fully integrated design allows direct solar connection,

Stellar Solar is excited to be a FranklinWH energy storage system Certified Installer. We've only worked with the best solar and battery vendors over our 27

You are looking for a home energy management solution with battery storage to optimize your household energy supply, backup, and consumption plans.
