Solar and wind power generated a fifth of Europe's electricity in 2022, overtaking gas for the first time. Here's what that means for energy transition.

The electricity consumption per capita in Germany and the average electricity consumption per household in Denmark were half the same value in

For example, to reach the EU's 2040 targets for renewable energy usage in France, Italy, and Germany, an additional land area of 23,000 to

Explore electricity generation by fuel type across the EU, Norway, the UK, and Switzerland on Eurelectric's platform. Access real-time and historical data on electricity demand, cross-border flows,

It covers a wide range of issues and topics including but not limited to markets, technology, policy and finance. The primary focus is on all forms of

In the first half of 2025, Germany and many other European countries generated more solar power than ever before. This was offset by lower

About The European Electricity Review analyses full-year electricity generation and demand data for 2023 in all EU-27 countries to understand the region's progress in transitioning from

EU statistics on electricity generation by source, electricity consumption of households, and the level of liberalisation are presented.

Replacing Russian gas and accelerating fossil free energy are top priorities in the European Union. Four years after Russia's full scale invasion of Ukraine, the transition is clearly under way --

Hungary: 5 key questions about the EU's most important election of 2026 Hungarians head to the polls in April -- and, unusually, someone besides

Iran's naval power sits at the crossroads of geography and strategy. With coastlines along the Persian Gulf, the Gulf of Oman, and the Caspian Sea, the Islamic Republic is not merely a

Europe's electricity generation is becoming increasingly clean, with countries such as Greece generating more from renewables than from fossil fuels for the first time in recent years.

Electricity consumption by households rose at a much faster rate than the EU average between 2013 and 2023
