

Oni smart storage

Yes, the smart storage bin is rather awful. Which is rather sad, it would be neat to have them just work, but I always use weight plates instead, which is more error prone and likelier to break.

I'd love to see the Smart Storage Bin and the Refrigerator updated with high/low threshold settings a la the Smart Battery for the auto output instead of the single full/not full setting they have

I've looked at the smart storage bin and had the settings to take in specific resources, and attached it with automation wire to a refiner. But it's red and can't figure out how to make it

The power shutoff wakes up the storage bin for two seconds every quarter cycle to check if it's empty. It also activates the memory toggle which

I've been playing quite a bit of ONI recently and think I have most of the systems down, but solid transport (and, on a simpler level, efficient storage) is causing me some frustration. I'm not totally

The Smart Storage Compactor is an item in Oxygen Not Included that was added in the Occupational Update. It stores resources of the player's choosing. This item is in the forth tier of Research under

Automatically-collected information: We automatically collect and store certain types of information about your use of the Sites or Games. This may include information gathered from your

Smart Storage Bin is a building that can store 20 tons (20,000 kilograms) of material. Unlike regular Storage Bins, they can output Automation signals when powered. The default storage

The problem with smart bins is they only have 1 threshold point, not 2 like gas and liquid storage, so what you propose WOULD be how people use it but alas

Smart Storage is in the fourth tier of Research and is a combination of Power Regulation and Advanced Research. Duplicants will need to additionally research Automatic Control, Generic Sensors, Brute

I have one for my industrial area what get all the fossil, clay, egg, shell, iron and iron ore, and some sand, sandstone, coal if a smart storage bin is empty. I have another storage hub for my farming area, my

I really wish the smart storage bin had a high/low threshold so the automation behaved similarly to the smart battery, gas reservoir, or liquid reservoir. i.e.

I much prefer doing that to having to fiddle with storage filters every time I need to get something out of my

Oni smart storage

infinite storage unit. I'm sorry, but this post literally and objectively is the "simple and easy" way to

Smart Storage Bin is a building that can store 20 tons (20,000 kilograms) of material. Unlike regular Storage Bins, they can output Automation signals when powered. The default storage capacity is 20

Oxygen Not Included - BasicsSmart Battery AutomationThe "Basics" Series is a group of tutorial videos for beginner concepts in Oxygen Not Included eck out ...
