

Renewable solar power

Enrich has bagged an award for a 300 MW Solar EPC Project from NTPC Renewable Energy Limited (NTPC REL), to be developed at NTPC Anta, Rajasthan.

A professional analysis of floating solar technology, its advantages, environmental considerations, cost factors, and growing role in global renewable energy strategies.

Since then, U.S. energy consumption from biofuels, geothermal energy, solar energy, and wind energy have increased. In 2023, renewable energy provided about 9%, or 8.2 quadrillion

BCI, Norges Bank Investment Management, and Brookfield launch Northview Energy with 22 contracted solar and wind assets totaling 2.3 GW across six U.S. power markets. Portfolio backed

Solar Energy Corporation of India Ltd. is a public sector company of the Ministry of New and Renewable Energy, Government of India, established to facilitate the

Renewable energy accounted for 75 per cent of the total power capacity addition in the country in the current financial year, with 39,657 MW capacity added so far, the Ministry of New and

Driving a clean energy future through state-of-the-art renewable technologies. Moving the world towards a clean energy future through harnessing the power

As India accelerates its renewable energy transition, the focus is shifting from merely adding capacity to building a resilient, integrated, and future-ready power ecosystem. With ambitious

Renewable solar project greenlit on Kauai AES Hawaii's Kaawanui Solar project will power the equivalent of more than 16,000 homes annually with clean, locally produced energy.

PM Narendra Modi inaugurated two Powergrid transmission projects worth INR3,600 crore in Rajasthan, enabling evacuation of 28 GW renewable energy and strengthening high-voltage grid

In the first quarter of 21st century, solar power was the third most widely utilized form of renewable energy after hydroelectric power and wind power; in 2022 it accounted for about 4.5

Solar technologies convert sunlight into electrical energy either through photovoltaic (PV) panels or through mirrors that concentrate solar radiation. This energy can be used to generate electricity or be

For example, instead of asking "Tell me about energy trends," try "Summarize the key

Renewable solar power

findings on renewable energy from the World Energy Outlook 2024." Ask

ACME Solar Holdings Limited's subsidiary has executed Power Purchase Agreements with SJVN Limited for 450 MW renewable energy capacity, comprising 300 MW and 150 MW contracts

Solar is central to decarbonisation. Costs have fallen sharply and deployment has accelerated, with solar photovoltaic (PV) on track to become

India as a renewable energy exporter. With 144 GW/year of module manufacturing capacity far exceeding domestic absorption needs, India is positioned to become a major global supplier of

Share of primary energy consumption from renewable sources Share of primary energy consumption from solar Share of primary energy consumption from solar

Australian retail giant Woolworths Group has announced it is 100% powered by renewable electricity across its supermarkets, distribution centres, BIG W stores and support offices in

Solar energy is the energy we get from the sun. It is a renewable source of energy that we can use to generate electricity for our homes, businesses, vehicles, and more. How does solar

Green Stocks Feb 27: Renewable Energy Pack Weakens, Few Stocks Defy Downtrend Alpex Solar emerged as one of the top gainers, rising over 5% during the session. Acme Solar,

Executive summary UK low-carbon renewable power set to overtake fossil fuels for first time 2024 is set to be the first full year where UK low-carbon renewables - wind, solar and

The partnership will support the training of renewable energy engineers, Solar Technology Application Centre (STAR-C) trainers, and research professionals, while promoting joint research,

The average cost per unit of energy generated across the lifetime of a new power plant. This data is expressed in US dollars per kilowatt-hour. It is adjusted for

Maharashtra approves Renewable Energy and Storage Policy 2025-2035, targeting 100 GW renewables, 65% green power and INR3.12 lakh crore investment.

Solar energy is renewable because it relies on sunlight, a naturally recurring, unlimited, and carbon-neutral resource. While the amount of sunlight that any
