Latest solar power news from Europe, Latin America, Sub-Saharan Africa, APAC, MENA and more. Stay updated on solar PV, solar energy, policy & projects.

The proposed floating solar plant in Koncanica is expected to improve the fish farm's operations but also bring benefits to the local community, Prusina said. It could help preserve jobs

Martin Green discusses how, over the past decade -- and continuing today -- we have witnessed a rapid increase in solar photovoltaic installations, a sharp decline in costs, and swift ...

Queensland-based gas business Arrow Energy has turned to solar and battery energy storage to help power its coal-seam gas operations in the Queensland's Surat Basin.

BRICS countries now generate more than half of the world's solar power In 2024, the ten BRICS members -- Brazil, China, India, South Africa, Russia, Egypt, Ethiopia, Indonesia, Iran and

Korean scientists have created a tunable, full-color solar window that does not lose its energy generation capability regardless of color.

It examines the current state of solar power and related academic solar energy research in different countries, aiming to provide valuable guidance for researchers, designers, and policymakers

GUELPH, ON, March 14, 2024 /PRNewswire/ -- Canadian Solar Inc. ("Canadian Solar" or the "Company") (NASDAQ: CSIQ) today announced financial results for the fourth quarter and full

News: Photovoltaics 2 March 2026 First Solar's US GDP contribution to grow from \$5.8bn in 2025 to \$7.8bn in 2027 A new economic impact study released by cadmium telluride (CdTe) thin

Solar power is boosting dry-season harvests, reducing migration, and strengthening livelihoods. A women's cooperative shows how clean energy can bring change.

Do industrial policies that promote clean energy offer a "ray of hope", increasing a country's growth and welfare, whilst simultaneously reducing carbon emissions? We study the impact of

Saudi companies to construct solar, wind power plants with capacity of 5,000 MW in Türkiye, with 2,000 MW solar power plant projects as 1st phase of investment, Türkiye's energy

horticultureTransportFuel productionSolar energy is the radiant energy from the Sun's light and heat, which can be harnessed using a range of technologies such as solar electricity, solar thermal energy (including solar water heating) and solar architecture. It is an essential source of renewable energy, and its technologies are broadly characterized as either passive solar or active solar depending on how they capture and distribute solar energy or convert it into sol

Explore the key differences between solar and lunar eclipses. This article explains how they occur, which ones are rarer, and how to observe them

SolarDuck has launched an advisory board to support the integration of its offshore floating solar technology within the CCS and wider offshore energy sectors.

This Eye-Catching Solar EV Startup Just Got Closer to Hitting Production Aptera says it finished building the first solar-powered car on its low-volume assembly line.

A professional analysis of floating solar technology, its advantages, environmental considerations, cost factors, and growing role in global renewable energy strategies.

We are here to bring you the latest solar news, progress and innovations, and everything else that you need to and want to know about the solar industry.

Solar water splitting is one of the most direct ways to produce green hydrogen using sunlight. However, most photocatalysts and photoelectrodes absorb only a limited portion of solar

An annular solar eclipse occurred at the Moon's ascending node of orbit on Tuesday, February 17, 2026, [1] with a magnitude of 0.963. A solar eclipse
