

Stellaris solar panels

Solar panels are complex devices used to generate electricity via the conversion of solar power. They can be assembled in a variety of ways to suit the requirements of the operator, and made to

Solar panels are generally not worth the cost on a starbase. If your economy is great in every other way then monthly trades of alloy's can ride you over on energy credits until you can build them up.

On one hand we have people who don't like sectors because they want to manage all 100 billion colonies they have and on the other hand there are people who want automation on

I can't seem to find a non-gestalt (only machine intelligence) that can build solar panels on space stations (seems to be replaced with trade hubs for everyone else).

Filling up starbases with solar panels are really good now! After a few techs each one gives about 10 energy. They compete with anchorages, but they can really power up your economy.

Does anyone else find solar panels a bit odd? I mean we start with fission generators, and pretty quickly after that we get fusion but you have to research how to put some solar panels on your starbase?

Planetary features represent notable areas found on natural planets. They determine the number of Districts the planet can support and some features exclusively obtained by events can

Starbase Solar Panel Income Suddenly Doubled I'm playing a game as Rogue Servitors atm and have lots of my energy production coming from my startbase solar panels. One minute my

Starbase Solar System Exploitation (4.2+) A small mod for enhancing starbases so they can provide a greater economic boost to your empire and have a greater impact on the planets in

A small mod for enhancing starbases so they can provide a greater economic boost to your empire and have a greater impact on the planets in system, inspired by some of the features of

Why are solar panels for gestalt consciousnesses only? Question Just seems like those and bio reactors could still be handy depending on build of non gestalts too. Archived post. New comments cannot be

Remember that time Admiral Zhao tried powering his fleet with solar panels in a nebula? Don't be Zhao. Use these strategies, and you'll be swimming in energy credits faster than a Tiyanki in an energy

Solar panels are only an option for gestalt empires. If you capture a starbase from a gestalt empire that already

Stellaris solar panels

had solar panels, they should remain in place, but non-gestalts can't build new ones.

We should just allow solar panels for everyone, there's no reason why a regular empire shouldn't be able to build those. Could coincide with a nerf on solar panels too.

Solar Panels... sert Your Chosen Layout. Realizing now I have dozens of planets... and they all can have a solar panel.... thats a lot of energy im throwing out.

Gestalt consciousness have solar panels because they don't have trade and don't use trade hubs. But normal empires should be able to use solar panels too. Archived post. New comments cannot be

Why are solar panels on space stations only for the gestalt?! I'm sure it has something to do with the lore of the hive mind and networking and some such, but considering that the ISS has solar panels and

Presumably because you are suppose to use trade and commerce for extra energy credits. But yeah, I would prefer having access to Bio Reactors and Solar

Solar panels are good earlier in the game, but after you can get a dedicated generator world, they don't really have much of a use, and even less so if you get a dyson sphere. I rarely put them in my own

Solar panels have been exclusive to gestalts for a long time now. Solar Panels are a gestalt-exclusive building. Trade Modules are now your starbases" "energy" production, and you'll need to safe-guard

Suggested New Starbase Building - Solar Panels Provides small amount of Energy per month Really, I just want something passive and generic (non Combat) to fill the last final Building
