

Synergy battery storage

CBESS is Synergy's third BESS and one of the biggest in the world, providing around 500 Megawatts (MW) and has 2400 Megawatt hours (MWh) of energy storage. The Collie battery and Synergy's two

Western Australian government-owned utility Synergy has installed the first 80 of 640 containerised battery units assigned to its Collie battery

Independent 2025 review of Synergy's Battery Rewards VPP. Learn how WA's Synergy VPP works, rebates available, event credits, technical operations, eligibility, and pros & cons for

Next Level Capacity Expansion Flexibility SYNERGY 150KW BESS Battery Bank. Modular design, support 1-4 batteries in parallel, Easy Installation; Floor mounted, saving installation time, keeping

Construction has begun on Synergy's Collie battery energy storage system, which will be one of the biggest grid-scale batteries in Australia when complete and will provide significant security

Western Australia's largest state-owned battery, 500 MW/2,400 MWh Collie battery energy storage system (CBESS), officially begins operations.

WA state energy company Synergy has broken ground on a new BESS in the town of Collie. Once completed, the system will have a capacity of 500MW/2,000 megawatt-hours, making it

For an on and off-grid power storage solution you can depend on, check out the advanced Battery Storage and Power Bank Solutions available from Synergy.

For an on and off-grid power storage solution you can depend on, check out the advanced Battery Storage and Power Bank Solutions available from Synergy. We have everything you need to run

Kwinana Battery Energy Storage Stage 1 (KBESS1) is the first transmission connected battery energy storage system (BESS) in the South West Interconnected System (SWIS). It has been developed to

SYNERGY STS provides robust Battery Energy Storage Systems (BESS) solutions, designed to meet diverse energy needs--from residential applications to large-scale industrial projects.

The Battery Rewards program is a rewards program for residential customers with compatible battery storage systems who participate in Synergy's Virtual Power Plant.

The Community Batteries for Household Solar Program is intended to support the lowering of electricity costs

Synergy battery storage

and emissions, support the storage of excess solar energy, reduce pressure on the energy

Battery storage is a game-changer for commercial renewable energy systems. It enhances energy efficiency, provides backup power, and supports

Battery storage technology has seen rapid improvements in recent years, delivering higher storage capacity at less cost. A battery storage installation provides a business with more control over its

Western Australian government-owned utility Synergy has commenced construction of its third grid-scale battery as the state government looks to ramp up energy storage capacity to support

FUN FACTS Synergy's Collie Battery Energy Storage System (CBESS) was delivered in about two years. Up to 500 jobs were created during the peak of construction of the 500 megawatt and 2,400 ...

Synergy's Battery Energy Storage System Stage 1 (KBESS1) was commissioned in 2023. The 100 megawatt / 200 megawatt-hour battery is a key element of the Western Australian Government's

With SYNERGY STS, you can secure a sustainable energy future while enjoying the peace of mind th SYNERGY STS provides robust Battery Energy Storage Systems (BESS) solutions, designed to

Kwinana Battery Energy Storage System 2 (KBESS2) is Synergy's second lithium iron phosphate (LFP), large scale battery energy storage system in the SWIS.

Large-scale battery energy storage systems are key in WA's transition to renewable energy and could help keep supply and demand for electricity stable. [Learn more.](#)

With a solar battery system, excess electricity generated by your solar PV system can be stored to use later. Here's our guide to batteries for solar panels.

A significant construction milestone has been achieved with battery units being lifted in place at what will be one of WA's biggest grid-connected

State-owned electricity provider Synergy has declared itself to be at the "leading edge" of energy management and storage technologies, after

Battery storage is fast becoming a critical part of WA's energy landscape. Synergy's Battery Energy Storage System Stage 1 (KBESS1) was commissioned in 2023. The 100 megawatt / 200 megawatt
