

Tailan new energy

Changan -backed solid-state battery startup Tailan New Energy has completed a B+ round financing exceeding 400 million yuan (?57 million USD)

Transcript: China EV Post reports that Tailan New Energy, a Chinese solid-state battery startup, has developed a groundbreaking all-solid-state battery cell.

However, Li Yan, CEO of Tailan New Energy, said that the key performance indicators of solid-state batteries developed by Tailan New Energy have achieved subversive breakthroughs.

Recently, the solid-state battery company New Energy Co., Ltd. New Energy" for short) completed hundreds of millions of yuan in Pre-B round of financing. The financing funds will be used for the

Tailan New Energy's breakthrough not only means that electric vehicles will say goodbye to range anxiety, but also indicates that the era of high-safety and high-density energy storage is

Thailand has initiated an emergency energy plan due to the Israel-Iran conflict, which has caused the closure of the Strait of Hormuz, a key route for 20% of the world's oil supply. As a primary

A 1,300-mile range should ease any worry among electric vehicle drivers about reaching their next destination on a single charge. But that

Tailan New Energy, a solid-state battery startup backed by Chinese carmaker Changan, has successfully closed a B+ financing round exceeding

Signing site It is reported that Tailan New Energy Shouxian Power Battery Industrial Park project plans to build a 10GWh semi-solid lithium battery

Tailan New Energy has unveiled the first fully solid-state cell theoretically capable of providing a range of 2,000 km on a single charge.

Thailand's next government, which should be formed by April at the earliest, will face mounting pressure from the private sector to push through structural reforms and find new growth

After completing another round of funding, solid-state battery maker Tailan New Energy (TNE) whose goal is to hit cost parity with current lithium

The project will provide strong momentum for Tailan to seize the global industrialization opportunities of

Tailan new energy

solid-state batteries, gathering strength to empower, and forging a new growth pole for the leapfrog

The new battery is lighter and boasts advanced electrodes, while its energy density surpasses conventional standards. Central to Tailan's innovation

Thailand may face sharp increases in fuel prices as escalating tensions between the US, Israel, and Iran push global oil markets into volatile territory. According to Energy Ministry sources,

New Energy, founded in 2018, is a company focused on the development and industrialization of new solid-state lithium batteries and key lithium battery material technologies. In the past two years, it has

At present, Tailan New Energy is building a new generation of 200MWh high specific energy solid-state lithium battery automation production line in Liangjiang New area of Chongqing,

As one of the representative enterprises of solid-state batteries, Tailan New Energy focuses on the development and industrialization of new

"Wake-up call" for Asean energy security as Singapore, Thailand face Iran war's LNG risks Long-term energy security is also a concern for Malaysia, the Philippines and Vietnam, which have

Das chinesische Start-up Tailan New Energy arbeitet derzeit an einer Festkörperlithium-Ionen-Batterie, die sich für Elektrofahrzeuge, Elektronik oder

In terms of structure, TAILAN has originally developed a brand-new "axial through" structure, which completely solves the thermal management

Moonshot AI - Beijing based, raised a funding of \$500M in Series C round held on Jan 02, 2026. Border Bank - Minneapolis based, raised a funding of \$500K in Series B round held on Dec 31,

Chongqing Tailan New Energy Co., Ltd., also known as Talent New Energy, is a developer of solid-state and semi-solid-state lithium batteries, positioning itself in the competitive energy storage market.

Tailan New Energy, a solid-state battery startup supported by Changan Automobile, has secured more than 400 million yuan (approximately 57 million USD) in a B+ financing round to

According to a report by Kuai Technology, Tailan New Energy stated that the goal of technological innovation is to achieve large-scale implementation. Only with the capability for mass

Tailan New Energy's vehicle-grade all-solid-state lithium batteries offer energy density twice that of other cells in the segment, empowering the Chinese battery maker to hail the cells as a...

Tailan new energy

The completion of hundreds of millions of yuan in Series B strategic financing by Tailan New Energy is of great strategic significance for the
